

DFW Ash pan refrigerator

Safe and conveniently arranged

A fireproof environment has been created to put down the filled ash pans to let them cool down. The ash pan refrigerator is equipped with a frame on the inside where six ash pans can be positioned. The ash pan refrigerator is provided with sufficient ventilation so that the remaining ashes can cool down to a temperature at which safe, further processing can take place. The cabinet is finished with black lacquer and has a brushed stainless steel door at the front.
