

Cremulator DFW Electric

Ergonomic and user-friendly

Ergonomics

DFW Europe has included in its range a new type of cremulator, which can be supplied in combination with the DFW Electric. This cremulator has an ergonomic-friendly working height for positioning the ash pan and the urn.

Finish

The cremulator is equipped with appropriate sound insulation to keep the sound level as low as possible. The outside of the standard design is finished with lacquer.

In order to obtain the best-looking result, the hatches are equipped with invisible hinges.

Processing

The fine-grinding unit of the cremulator works according to the principle of chains grinding the remaining ashes, after which the ashes fall into the urn through a perforated sheet. Any metal parts contained in the ashes are returned to the ash pan after the ashes have been ground.

The cremulator is controlled by a PLC which is operated from a 5.7" touch panel on the right-hand side of the upper hatch of the installation.

Cremulator:

Electrical installation:	400V, 16A
Process time:	approx. 2 min
Grain size:	< 3.5 mm
Urn height:	from approx. 200 to 350 mm
Sound level:	50-55 dB
Weight:	approx. 350 kg
Dimensions:	l: 1200 mm h: 1900 mm w: 645 mm
